- ➔ Facilitate falling asleep and improve sleep quality

ORDER NOW

HARNESS THE POWER OF SLEEP TO LOSE WEIGHT!

Night is a particular time for your body. Proper rest supports post-workout regeneration, gives you energy, and allows you to face the following day's challenges with full force. **During sleep, metabolism slows down, body temperature drops, cell renewal and increased growth hormone production occur.** How can you use this to your advantage?

Night Mega Burner is a unique dietary supplement that supports burning fat during sleep. It contains a unique blend of ingredients that work synergistically and multi-directionally. **Night Mega Burner is free of stimulant ingredients to guarantee uninterrupted sleep and adequate recovery.**

NIGHT MEGA BURNER

Supports the reduction of excessive pounds

Stimulates the body's metabolism

Supports the achievement of a relaxed state

Facilitates falling asleep and improves sleep quality

Choose wisely and take care of your figure also at night. Sleep soundly and burn fat!

RELIABLE AND TESTED COMPOSITION

GRAINS OF PARADISE SEED EXTRACT [12.5% 6-PARADOL]

Madagascar aframon, also known as the grain of paradise, is a plant native to Africa. It is extremely rich in 6-paradol, a chemical compound that has shown weight loss support properties.

Clinical studies confirm that it can increase the body's energy expenditure, stimulate fat reduction, and improve the body's lipid profile. Additionally, it also shows thermogenic effects, increases glucose utilization and inhibits lipid synthesis in adipocytes.

KSM-66®

Ashwagandha extract standardized to contain 5% vitanolides.

Also referred to as withania somnifera, this plant supports the body on many levels. **Studies indicate that it can effectively support stress reduction, improve concentration and cognitive abilities, and improve sleep quality.**

The use of KSM-66® has also been shown to effectively improve cardiorespiratory fitness, reduce body fat, improve muscle recovery, and increase muscle strength and growth rate.

GREEN TEA LEAF EXTRACT [40% EGCG]

The highest quality green tea leaf extract containing as much as 40% EGCG

EGCG or epigallocatechin gallate is a polyphenol which shows strong antioxidant activity. **It can contribute to supporting fat reduction, improving the body's lipid profile and regulating blood sugar levels.**

EGCG's mechanism of action is to inhibit the activity of COMT, the enzyme that breaks down norepinephrine, thereby prolonging the stimulation of the sympathetic nervous system and stimulating thermogenesis.

Saffr'Activ®

- improves overall sleep quality
- improves falling asleep
- reduces feelings of anxiety

Lemon Balm Herb Extract

• facilitates a state of relaxation prolonging the stimulation of the sympathetic nervous system and stimulating thermogenesis.

L-Theanine from Green Tea
