Results not typical from PRO freelancers. You may get worse, better, or no results at all.

For example, a fiverr freelancer named “Delicate Motion” charges clients $1,245 for a single premium gig which is a 30 second long 2D explainer video.

Upwork’s freelancer Davi S. charges $120 per hour for an explainer video. Till now, he has already earned more than $400,000 from his video creation gigs.

Here are a few other freelancers selling similar services, like Heni who charges $605 for 90 seconds video ads; or ljfils who asks for $995 for 90 seconds explainer videos; or Steve A. who also does explainer videos and has already earned more than $100,000 from his work.

Endless Amount of Gigs

There are many more people on fiverr and upwork selling similar services with the track records publicly reported.

With the economy crumbling and businesses moving online at the fastest pace than ever, now there is the biggest opportunity I've seen in a very long time, to start earning and growing an online income with video, and to make money from selling videos and video services to clients.

Because businesses always need more videos, the amount of work is endless, but you do need to have the cutting edge tool to enable you to do that and stand out from other freelancers.

Freedom To Work From home Or From Wherever You Want

Explaindio Business Edition might be just a foot-in-the-door tool that you need for businesses to choose you instead of your competition.

The best part is that with a video creation business you have a freedom to work from home or from wherever you want.

The Internet is always open for business, so you can work when you want and with whom you want.

Video Selling Plan Details **Part 1**

You may modify that starter plan however you like, but it is a good goal for you to shoot for.

An average video is 4.4 minutes long

So at just $200 a minute, you'd be able to charge $1,000 or more for a 5 minute video.

And the best part? With Explaindio Business Edition, you'll be able to create videos with ease in multiple different styles.

From doodle videos, to explainer videos, to 2D or 3D videos, or even training videos.

2D & 3D VIDEO CREATION

Theoretical plan only. You may get worse, better, or no results at all.

Video Selling Plan Details **Part 2**

Explaindio
Business Edition

Theoretical plan only. You may get worse, better, or no results at all.

A 5-minute long video would take you minutes to make... and you could charge $1000 per a video....By making just one 5 minute video a week, you could charge $4000 a month, or $48,000 a year!

Imagine what you could do if you took just a few hours a week, created 20 minutes of a video at just $200 per minute per video...

That's 20 minutes x $200 per minute..That's $4000 a week. That's $4000 a week.. times 52 weeks... That's $208,000 a year....

All for a few hours of work a week.

Ok – I know what you're thinking..
