How To Launch Your Own Woodworking Business For Under $1000 and Make $90,000-$150,000 a year!

Jim Morgan

From: The Desk of Jim Morgan
Home-Based Woodworking Business Owner & Enthusiast

Starting a woodworking business will be one of the **best decisions** you'll ever make in your life...

Your woodworking business will provide you with a great part-time income while allowing you to spend more quality time with the family.

Best of all, ***you will have FUN doing what you love.***

"Discover The Step-By-Step Guide To Launching Your Woodworking Business From Home... With Minimal Capital!"

Lets face it... times are tough right now. People are losing their jobs and struggling to make ends meet.

If you've been thinking about starting a home based business, it needs to be something fun and easy to start.

The good news is, I can show you how to get a **nice extra part-time income** by turning your passion into profits and working right from your garage...

The *"Dirty"* Little Secret of Home Woodworking Businesses

Here it is: You *DON'T* need to be a professional woodworker or own a huge workshop with expensive machinery to succeed!

All you need to know is the "what", the "who" and the "where"...

- WHAT items to actually make for the most profits,
- WHO to sell it to... and
- WHERE should you sell it from

It's really that simple and I'll explain it in a while...but first,

" I Have A Confession To Make... I'm NOT A Risk Taker "

And if you're like me and you'd prefer to leave risk taking to skydivers and Wall Street goons, then you're in good company.

Because, starting a profitable woodworking business is not as risky or difficult as you think. Now...

- ✓ **If you want an easy-to-start business** that does NOT require you to fork out an arm and a leg for expensive machinery or tools.
- ✓ **If you want a business that allows you to work from home** and gives you more quality time with your family.
- ✓ **If you want something that you can do in your spare time** that does not interfere with your regular job.
- ✓ **If you want a business that you can grow** and become a full time thing *(if you chose to do so).*
- ✓ **If you want an opportunity that would provide a lot of income**, quickly and easily with the skills you already have...

***Then listen up closely** as this is the most important letter you'll ever read...*

But before I continue, it is important that I share with you a bit of my story. You'll understand why in a minute...

"I Started My Business In A Small 10x20 Feet Space"

My wife thought I was crazy then.

My humble 10x20 feet workshop when I started in June 1994

I was jobless. We were at the end of our money with 2 kids to feed. *And I'd never sold so much as a birdhouse.*

In fact, you'd never have guessed I was a wood worker.
My 10x20 "workshop" was smaller than many peoples' closets...

I didn't have bunch of fancy or expensive tools...

Yet surprisingly *(to everyone else but me)* I went on to earn **over $150,800 in sales in my first year**, working about 20 hours per week.

How?

Because I figured out the ONE that really matters when it comes to making a great income from wood working...

How to get customers.

And not just how to get them...

But **how to get paid**… *before spending a fortune on tools and supplies.*

This meant unlike most wood workers, who go deep into debt before earning a single dollar…

I was able to make a profit from day 1.

Which I think you'll agree, matters more than ever in today's economy.

Because while many folks worry about whether their job might be the next on the chopping block…

And since then,

My Simple Small-Scale Woodworking Business Keeps Paying Me An Average of $12,574 Every Month…

The same way it has for over 25 years…

Now you can *have the advantage over me* when I started.

You don't have to suffer through the painful mistakes I've made because ***I will show you how YOU can avoid them*** and start getting sales from the get-go.

So whether you're looking to replace your job with a home business you can run "part time"…

Or love your job but could use a bit more financial security…

Listen closely to what I'm about to share with you today…

"Is This Guide Right For Me?"

If you're like a lot of us, you've probably seen plenty of training "opportunities."

So even though hundreds of woodworkers just like you have started successful home businesses with WoodProfits… you may be wondering if this is right for you.

Well, I'm going to be honest with you – ***there are just some people who shouldn't waste their time with this guide.***

And, really, I'd rather be up-front about it, because those people end up wasting my time too.

So let me tell you right now that this is **NOT** the guide for you if:

- ***You're an "info-junkie"*** who just loves to take courses and buy "how to" guides without doing anything with the information. I don't really care about the $39 – that's just to cover my costs, keep my software up, and keep the guide updated. What I really care about is your success. So if you're not going put any effort into ramping up your sales, *don't buy this guide.*

- ***You're the type of person who likes to blame your setbacks on others.*** Look, we all have to stare failure in the eyes occasionally… but successful woodworkers learn from their mistakes, instead of looking for someone to blame! If you refuse to own and grow from your mistakes, then definitely don't buy this guide.

- ***You're looking for a "magic button" that will fix everything overnight*** without massive action… I'm afraid that you're always going to be looking for the next quick fix. This is a proven blueprint, but you still have to follow it to get results. So if you're looking for magic, then *absolutely, positively don't buy this guide!*

Praise for "WoodProfits"

"A must-have"

"A must-have for those just starting out in their business.

It's obvious Jim did extensive research. It is extremely detailed, in-depth, and chock full of resources; yet, the writing style flows and is easy to read."

- David Wagner,
Minden, NV

"The only book you'll need"

"If you want to read just one book about starting a business selling wood crafts, this would be the one.

I read a different book first and had more questions than answers. This book finally answered all of my questions, including many I didn't even know I had."

- Madeline Le,
Bellingham, WA

"An excellent resource"

"I recently bought a copy and found it to be an excellent resource. In my opinion, it's the definitive book for anyone thinking about starting a woodworking business"

- Glen Kirkland
Kansas City, MO

Okay, none of those apply. So who IS this for?

Fair enough. Now that we've weeded out the "riff raff," so to speak…

You're still here, so that tells me right away that this is a PERFECT fit for you.

But let's be a bit more specific – **WoodProfits is ideal for you if ANY of the following apply:**

✓ **You're a woodworker of any experience or skill level who is passionate about the craft.** This isn't just for 25-year veteran woodworkers like me – no matter whether you've just created your first piece or you've been creating signature pieces for decades, you'll find a wealth of wisdom to take your business to the next level! *(Oh, and it doesn't matter what types of items you create, either – from wood jewelry to custom furniture, this guide covers it all!*

- ✓ **You're looking for some part-time or retirement income.** Some of the most talented woodworkers I've ever met have stayed broke and undiscovered because of some deep-seated belief that they lack the skills to run a business. If that's you, then you're in luck – you can LEARN everything you need to know (and do it pretty quickly, too). It's time to cart that belief out to the trash can where it belong

- ✓ **You're a "hobbyist" and don't have the interest in building a business right now.** I meet LOTS of woodworkers who take a similar approach. And at one point or another, almost ALL of them ended up turning to their skills to make extra money for vacations, savings, or emergency expenses. It's great to know how to turn on that cash flow whenever you need it!

- ✓ **You're already doing pretty well with your business.** Maybe you've figured out the basics of pricing and you're (usually) making a profit. That's great! Now, let's dive into the advanced strategies that will help you optimize your profits... and kick up your sales volume so you can upgrade your lifestyle!

One last thing – after you've had a chance to implement all the strategies and tips to start your own woodworking business in the **WoodProfits**

...please consider sending me a note to let me know how you're doing.

I LOVE hearing how the insights and information inside this guide help you achieve success!
